USB-C connector / CC terminations

ASSUMPTION: 5 V power-only demo; no PD or data function.
Separate CC termination resistors shown for tooling only.
Input protection and source-current policy are not qualified.

LDO / local capacitors (tooling example)

ASSUMPTION: capacitor values and load budget need review.
DEMO_3V3 is a named net, not a measured output.
Revision F uses AP63203 buck; do not copy this LDO into it.

TOOLING PROOF ONLY — not the Bridge One schematic
